

COMPACT CUT-UP SYSTEM (SMART GUIDING)

foodmate

Poultry Processing Systems

Foodmate Compact Cut-Up Systems are designed to provide both a logistical and cutting solution allowing the cut product to be distributed throughout the processing facility. Each system is designed according to the plant layout and cut-up needs. The systems are available in different configurations to meet variable product mixes. Some systems are as simple as just dropping front

halves and cutting leg quarters, while other systems may have complex functionality to distribute product to different locations in the plant, based on weight range.

To minimize down time and maintenance costs, all Foodmate Compact Cut-Up Systems are equipped with Foodmate auto-correcting Magnetic Shackles. Line speeds can vary from 80 birds per minute on 12" centers to 140 birds per minute on 8" centers.

Our mission is to innovate, automate and bring cost-effective solutions to the industry.

COMPACT CUT-UP SYSTEM

Includes for example the Following Machines:

Smart Guiding Cut-Up System

- Super Wing Cutter
- Precut Machine 7
- Halving Machine
- Saddle Cutter, Twin Blade 2 Motors
- Thigh & Drumstick Cutter
- Compact Unloader
- Control Box

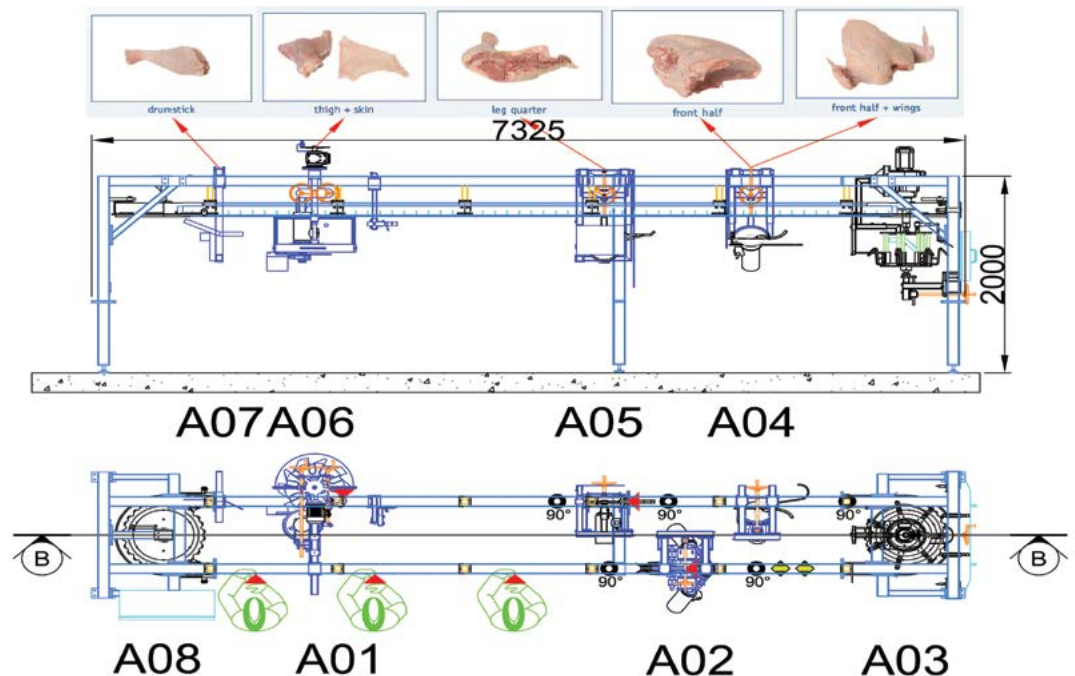

Key Benefit:

- Allows for a maximum of 6,000 birds per hour.

Foodmate is an equipment manufacturing company based in the Netherlands. Founded in 2006, we focus primarily on poultry processing, and we recently launched Foodmate US, expanding our worldwide distribution into North America. Driven by research, paired with unmatched knowledge and decades of experience, it's our mission to innovate, automate and bring cost-effective solutions to the industry.

Our product line spans a wide assortment of processing equipment designed for live bird handling, killing and defeathering, eviscerating, chilling, weighing, cut-up systems, deboning, and more. In addition to manufacturing, we provide an extensive variety of spare parts and service for other processing equipment and reconditioned machines.

Our team represents decades of industry knowledge and experience resulting in the engineering, development and implementation of new designs for our clients and their ever-changing needs.
